SCRUM-6 / SCRUM-10
On-Call Engineer Routing
Description
As the system, I want to identify the active on-call engineer from the configured rotation schedule and route the incident alert to that engineer, so that incidents reach the correct person responsible for handling them.

SCRUM-6 / SCRUM-12
Incident Status & Escalation Monitoring
Description
As an Incident Commander, I want to view incident status, escalation history, assigned engineers, and acknowledgement details, so that I can monitor ongoing incidents and their response progress.

Improve Story
Description
As an Incident Commander, I want to record incident resolution details and maintain a post-mortem record containing the incident timeline, actions taken, and outcome, so that the team can analyze incidents and improve future incident response.

Automatic Incident Escalation
Done
Done
Improve Story
Description
As an on-call engineer, I want unacknowledged incidents to be automatically escalated to the next engineer in the escalation ladder after 5 minutes, so that critical incidents are not missed when the primary engineer is unavailable.
